Sir:

The patents and/or publications listed on the enclosed PTO Form-1449 are being brought to the attention of the examiner pursuant to 37 CFR §§ 1.56, 1.97, and 1.98. Copies of the foreign publications and other documents are enclosed as necessary.

FR2433983 appears to disclose a fragrance dispenser that has a wall mounted housing that encloses an aerosol container and a lid disposed over a top end of the aerosol container. Downward pressure applied to the lid transfers force to the container to actuate a valve therein and dispense the fragrance therefrom.

FR 2292528 appears to disclose a fragrance dispenser that has a wall mounted bracket that holds an aerosol container. A top portion of the bracket includes a spring loaded plunger that is vertically actuated by a cam on a horizontally actuatable member. A lever mounted outside of the bracket via a cable allows remote actuation of the horizontal member.

FR 2523479 appears to disclose a fragrance dispenser that has a wall mounted bracket that holds an aerosol container that may have a tilt-actuated or vertically actuated valve stem.
